Product Introduction:

The Practi-CRM Compression Rate Monitor is used for validation of proper compression rate during classroom instruction of CPR. It allows for instant feedback to both instructors and students regarding the rate of chest compression. This allows each student to gauge their rate of compressions on their own as well as allowing the instructor to monitor several students quickly and easily.

The indicator works in the form of a green light when the compression rate reaches or is greater than 100 compressions per minute, and a red light when less than 100 compressions per minute. The watch design makes the device easy to operate and carry.

Features:

1. ON/OFF button
   Press once to turn unit on and press again to turn it off. The device, if activated accidentally, will turn off automatically after 3 minutes.

2. Dual-colored Indicator Light
   The indicator light will turn to green when compressions are 100 per minute or more. A blinking red light will be visible when compressions are less than 100 per minute.

Components:

- Compression Rate Monitor
- Instruction manual
- Storage case (4pack/1pack)

Operating Instructions:

1. Remove the Compression Rate Monitor from the storage case, straighten out the wrist band and wear the monitor on the wrist.
   (Note: it must be worn in a specific direction as shown, e.g., the ON/OFF button should be on the side closest to the elbow.)

Available at www.MCRmedical.com
2. Press the ON/OFF button to turn the unit on. Your Practi-CRM is now ready to use.
3. Turn the unit off when not in use or when training is completed by pressing the ON/OFF button.
4. To prevent possible damage the monitor should be stored in the storage case for transporting.

**Replacing the Battery:**

1. Remove out the unit from the wrist band.

2. Open the battery compartment in the back of the unit by turning the compartment cover counterclockwise.

3. Install Battery CR2032 with anode (+) facing up. Please assure you are using a new battery for best performance.

4. Reposition the battery compartment cover turning in a clockwise rotation.

5. Put the unit back in the wrist band noting the proper direction of the ON/OFF button as shown.
